

# BIC Code Recognition Software

Cognitechna BIC

Version: EN20220326

The Cognitechna BIC Detector is a tool for detection and parsing of container photos taken for passporting. The detector parses all information from BIC including:

- BIC Code + position
- ISO Code + position
- Validity check
- Horizontal and Vertical BIC support

It uses the latest neural network algorithms for reliable and fast detection of BIC codes. The SDK allows to efficiently process a large number of images. C/C++/C# and Python languages are supported.
